

## Warhammer Underworlds UK Team Championship 2018

Welcome to the Warhammer Underworlds UK Team Championships! It is an annually run team tournament for the game of Warhammer Underworlds by Games Workshop.

The UKTC is an event for a group of players (three to be specific) enabling you to compete as a team rather than on your own. This event is suitable for every kind of Warhammer Underworlds player; from groups of like-minded friends to battle hardened close-knit practice groups.

### When and Where

Saturday 6<sup>th</sup> October 2018

The Jury's Inn, Midsummer Boulevard, Milton Keynes, MK9 2HP. England

### Basic Tournament Rules

- The Warhammer Underworlds UKTC is run under the official Warhammer Underworlds system as published by Games Workshop. Unless otherwise stated.
- The UKTC is a team event with each team comprised of three players.
- The tournament will require each player to bring 1 Warband with Ploy and Objective decks. Across a team, no player may have the same warband.
- WU:Shadespire with all expansions contained; plus WU:Nightvault deluxe expansion (only) are all valid for this event.
- Our policy on model conversions is that models must be easily identifiable on the tabletop. i.e. your opponent should be able to easily recognise all the models in your warband.
- The tournament is scheduled for 5 rounds (it will stop when we have one undefeated team). Each round will be 70 minutes, this includes 10 minutes for individual pairings and setup.

### Logistics

The Warhammer Underworlds UKTC will be run over one day consisting of five rounds (we will stop once there is one undefeated team).

- While players are free to use any language or translated player aids, the official language of the UKTC is English, and all players are required to have the English versions of their cards on hand. All rule disputes will use the English version of the rules as reference.
- Make sure to keep an eye on the UKTC Facebook page for details after this pack is published.

## **Round Pairings**

The UK Team Championship will employ an interesting and challenging method for determining the pairings of players within opposing teams for each round.

- Teams will be paired off against each other randomly in the first round and use the “Swiss Chess” system from the 2nd round onwards
- A team will never be matched against the same team twice

The captains from each team will work together to determine the individual pairings of the players within their teams using the following method:

- Teams will declare what warbands they are using
- Teams will toss a coin. The winner of the coin toss decides which team will pick the first pairing. Team A will pick the first pairing, Team B the second pairing.
- Team A captain nominates his/her first player and picks a player from Team B to be their opponent.
- Team B captain then nominates his/her second player and picks a player from Team A to be their opponent.
- The remaining players will make the last pairing.

## **Round Timing**

- Each round will go for 70 minutes from the time the pairings are announced.
- Round pairings & setup should take a maximum of 10 minutes.
- Each game will be 60 minutes.

## **Tournament Scoring**

- The team that gains 2 or more victories from the 3 games in a round is declared the winner and receives one 3 tournament points. The losing team receives 0 points.
- In the event of a 1:1:Draw match result we will use the following criteria. The 3 pairings in each team will add their total glory. The team with the highest glory will be the declared the winner and receive 3 tournament points. The loser will receive 0 points.
- If both teams are still tied at this point the game is a draw and both teams will receive 1 point.
